DETAILED ACTION

Examiner acknowledges receipt of request for extension of time and remarks filed 08/06/04. Claims 1-6 and 10-15 are pending.

Claim Rejections - 35 USC § 112

1. Claim 15 remain rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants attempted to include/recite active method step(s) by adding "addition to the composition of" phrase to the claim after comprising in line 2. However, the claim is vague and indefinite because the claim does not define or recite what is added to the composition to complete the method step. What is added to the composition to reduce the levels of tack? Claim 15 starts out by reciting "a method for reducing levels of tack in a skin care composition comprising..., the claim reads as a composition without the recitation of what was added in the method step.

Claim Rejections - 35 USC § 102

2. Claims 1-6, 10, 11 and 13-15 remain rejected under 35 U.S.C. 102(e) as being anticipated by Tanner et al. (US 6,024,942).

Applicants argue that the instant claims use water swellable cationic polymers in compositions to produce compositions that exhibit low level tack and that Tanner does not use water swellable cationic polymers.

3. Applicants' arguments filed 08/06/04 have been fully considered but they are not persuasive.

Tanner discloses the cationic polymers of the claims.

Claim Rejections - 35 USC § 103

Page 3

4. Claims 12 remains rejected under 35 U.S.C. 103(a) as obvious over Tanner et al, *US 6,024,942) in the alternate.

Applicants argue that Tanner does not use water swellable cationic polymers to reduce levels of tack in leave-on cosmetic compositions.

5. Applicants' arguments filed 08/06/04 have been fully considered but they are not persuasive.

Tanner discloses the cationic polymers of the claims and these polymers are water swellable. Since Tanner discloses water swellable cationic polymers, it would not be necessary for the person of ordinary skill in the art to select water-soluble polymers. The rejection was presented in the alternative because the amount of the cationic polymer is either anticipated or rendered obvious by Tanner.

6. Jones et al. (WO 96/03967) was made of record. Applicants argue that "polymers with identical monomer(s) and identical molecular weight(s) can have very different glass transition temperatures depending upon a number of factors" such as the level of branching within the polymer. However this argument is not persuasive because applicants are relying on limitations not recited in the claims.

Observation:

Applicants made no remarks on the observation and suggestion that cellulosic be changed to cellulose and cellulose be used in place of cellulosic derivatives.

No claim is allowed.

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 09/890,921 Page 4

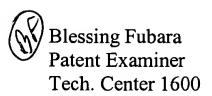

Art Unit: 1615

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blessing M. Fubara whose telephone number is (571) 272-0594. The examiner can normally be reached on 7 a.m. to 3:30 p.m. (Monday to Friday).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K. Page can be reached on (571) 272-0602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
